

TURCO[®] 5442 WD

CORROSION PREVENTIVE, WATER DISPLACING COMPOUND

Description

Turco 5442 WD is a solvent dispersed corrosion preventive compound which forms a thin clear protective coating when applied by brush, dip or spray.

The coating will dry to a soft film.

Turco 5442 WD is safe on all metals and paints used on aircraft. It is easily removed with alkaline based aircraft exterior cleaners such as Turco 5948-R.

This product meets the requirements of MIL-C-16173D, Grade 3 and is intended for short-term corrosion protection where surfaces to be protected may be frequently recoated and where a clear film is desired.

It is intended to give protection of surfaces against corrosion for periods up to six months.

It is not injurious in any way to personnel, if reasonable procedures and safety precautions are used. Flash point is over 60°C, therefore a good ventilation for the rooms where drying takes place, is recommended.

To remove this product from large areas, wipe it off with Turco Solv 60 S AL. Alkaline cleaners, steam and emulsion cleaners will also remove this product.

Toxicity and hazards

Turco 5442 WD contains petroleum distillates. Do not take internally.

Avoid prolonged contact with skin or prolonged breathing of vapor. Consult MSDS before use.
